

**Price: \$1/family member unit/year**

Initial release Q4 2009 (Last update Q3 2011)

ChaverWeb provides a tool that will be on your Synagogue's web site, and allow your members to log in and view and edit their **own** demographic data, view the status of **their** account and make payments, register for events and Religious School, view an online directory and make contributions to the Synagogue with optional tribute notices.

Your Chaverware data is still stored right in your Synagogue's building on your computer/File Server. The data that your members access is a mirror image of that data. When they edit and change their own data, they are NOT changing the data in your Chaverware. They are working on the mirror copy. On a daily basis, a synchronization process is invoked to mirror the two systems again. During this process, the office user is presented with a list of changes that have been made by the member on the web, whether they are demographic changes Yahrzeit changes, event signups, religious school registrations, payments on open items or new contributions. The office user is then given the opportunity to reject, accept or ignore any or all changes prior to that data being written to your system.

## ChaverWeb Data fields available for viewing and editing

### For each member:

#### Personal

Title  
First Name  
Middle Name  
Last Name  
Suffix  
Nick Name  
Birth Name  
Birth Date  
Anniversary

#### Religious

Hebrew Name  
Tribe (optional)  
Bar/Bat Mitzvah Date (If in the past)  
Bar/Bat Mitzvah time  
Bar/Bat Mitzvah location  
Bar/Bat Mitzvah portion  
Yahrzeit Observances including:  
Deceased Name  
Deceased Date of Death  
Next Yahrzeit Date  
Relationship to Observer

#### Contact

Up to 4 mailing addresses with flag for current
